BASF Podcast: The Chemical Reporter - Why does caffeine have a stimulating effect?

Ludwigshafen (ots) -

The very first thing many people do when they stumble out of bed in the morning is pour themselves a cup of coffee. The substance in the hot brew that helps wake you up is well-known all over the world: caffeine. Caffeine doesn't only come from coffee beans. Most of the caffeine is synthetically manufactured by the chemical industry. In entertaining episodes our Chemical Reporter answers questions of our Podcast listeners on Chemistry in our everyday life.
