

## New Einhell cordless ash vac for thorough cleaning of fireplaces and barbecues

Landau an der Isar, 3/16/2022 – Einhell Germany AG is widening its range of cordless Power X-Change tools and adding the first 18 V cordless ash vac TE-AV 18/15 Li C. With its maximum 100 mbar suction power this vac can pick up as much as 15 liters of ash efficiently and reliably. *And thanks to the vac's cordless drive the user not only has maximum freedom of movement but is also independent of power sources.*

### Innovative filter cleaning system

Open fireplaces and tiled stoves remain in nearly daily use throughout the annual transition periods of spring and autumn. The results are stoves full of ash and soot that need regular cleaning. To tackle this challenge in as comfortable a way as possible it pays to use an ash vac. Unlike conventional vacuum cleaners, an ash vac is fireproof thanks to its metal housing, a metal-reinforced suction hose and non-flammable filter material. There is also a pleated filter to prevent ash from being carried back into the surroundings by the discharged air.

Using a maximum suction power of 100 mbar the new cordless ash vac TE-AV 18/15 Li C from the Einhell cordless Power X-Change family sucks up fuel residues from fireplaces, tiled stoves and barbecues, and it also removes dust and dirt from hard-to-reach corners and gaps.

And thanks to the vac's cordless drive the user also has maximum freedom of movement and is independent of power sources. Four castors and a carry-handle enable flexible use and easy transport of the cordless ash vac.

An integrated filter cleaning system frees the pleated filter of fine dust and ash, helping to keep suction power at a high level. Up to 15 liters of ash can be sucked into the large and sturdy tank made of rust-proof stainless steel. This means that the tank does not need to be constantly emptied even on large-scale assignments. Opening and removing the tank lid is easy thanks to quick-release levers. For convenient storage of the ash vac in minimum space there is a hose rewind on the tank lid along with holders for the suction tube. To use the practical blower function you simply have to reconnect the hose to the air outlet.

The mobile cordless ash vac TE-AV 18/15 Li C is a new member of the high-performance cordless Power X-Change family. Photo: Einhell
