Analysis - Developer of mines with more than 200 projects

The latest report from researchanalyst.com goes details the Canadian mining and commodities developer. The Canadian-based company has a broadly diversified portfolio with numerous mining projects of closed mines where prospective exploration can be reactivated. In times of raw material shortages and supply chain hedging, Globex Mining Enterprises Inc. is thus in an extremely promising position. Company founder and CEO Jack Stoch has been an incubator and investor for decades and knows the cycles of this business better than anyone. The Company's history dates back to 1949 - reason enough for researchanalyst.com to take a closer look at the topic.

Excerpts and facts about the report at researchanalyst.com:

- "With more than 200 projects and properties and 40 former mines, Globex has secured good stakes and benefits from consistent royalty payments over time through partnerships."
- "Critical future supplies of all 62 metals and transition metals on the periodic table have now been comprehensively determined for the first time by experts from Yale University in New Haven."
- CEO Jack Stoch: "Globex has no debt and owns everything down to the pencils."
- "217 projects. Broad diversification into precious metals, non-ferrous metals, polymetals, and specialty metals and rare minerals. 89 royalties and 8 active options."
