

Watering the garden – now without cables! With the AQUINNA cordless garden pump from Einhell

Landau an der Isar, May 27, 2019 – A particular highlight from Einhell for this year's gardening season is AQUINNA, the world's first cordless garden pump, which is also a member of the Power X-Change rechargeable battery family. The battery pack platform already includes over 100 cordless tools and garden implements and is due to be expanded to at least 130 different products by the end of 2019. With the new cordless garden pump, which will be available from specialist retailers from autumn 2019 onward, watering the garden will never have been easier.

Simple pumping solutions – mobile and flexible

Hobby gardeners who are particularly keen on a lush, green lawn and well-kept plants need to be very careful when it comes to watering the garden. It is the only way to ensure healthy and rich growth. However, to keep a lid on water bills it is a good idea to use rainwater or water from a well or cistern for watering. The easiest way to do this is with a garden pump.

Here, the AQUINNA Cordless Garden Pump from Einhell, which is the first device of its kind in the world in the Power X-Change range, offers maximum freedom of movement as it can be used in areas where there is no electric power supply. In contrast to solar pumps, it is still ready for operation when the sun isn't shining or when positioned in the shade, as well as both early in the morning and in the evening.

With a delivery head of up to 26 m, a suction height of up to 8 m and a maximum delivery rate of 3,000 liters per hour, the AQUINNA Cordless Garden Pump also scores top marks for performance.

Thanks to a 2-stage ECO switch, users can choose between operation in energy saving mode with a lower delivery pressure or delivery at full power. An overheating protection function is also integrated as an important safety element, and this will switch off the pump automatically if it is overloaded. The unit also offers a water filling screw and a water drain screw to protect it against frost during storage in the winter months.

In addition to the protective functions, the pump also has a practical carry-handle and robust brass connections, which ensure a long service life. It is operated with 2x 18 V rechargeable batteries, which can also be transferred quickly and easily to one of the other over 100 Power X-Change garden implements and cordless tools.
