

Cordless cleaning with Picobella from Einhell – the new all-rounder for stone and wood

Landau an der Isar, January 28, 2020 – From March 2020, the Picobella Cordless Surface Brush will be joining the Power X-Change family of cordless tools from Einhell. The device will be offered with several brush attachments for perfect cleaning of different surfaces. Thanks to the integrated garden hose connection, wet cleaning is also possible.

Thorough spring cleaning for house and garden

For many hobby gardeners and homeowners, the start of spring can only mean one thing: time for a major cleanup operation. Not only inside, but also in the garden, where major cleaning and scrubbing efforts are undertaken to get everything spick and span again. Particularly on floors though, this can be very arduous and tiring, so a surface brush specially designed for the cleaning of paved surfaces or wooden floor coverings can be the ideal solution. Natural green fouling and coatings with moss or other dirt can be easily removed – without straining your back – with the new Power X-Change Cordless Surface Brush from Einhell. Its freely height-adjustable telescopic handle can be easily adapted to any height with just a few easy adjustments. With no interfering cable to get in the way and an 18 V Power X-Change battery pack, the surface brush is ready to use straight away.

2-in-1 function: Wet and dry cleaning for all requirements

With different brush attachments, which can be changed at the simple press of a buttons without any need for tools, the device is quickly ready for any task.

It comes with the “Medium” nylon brush for cleaning smooth stone like tiles or concrete as standard. With the integrated side brush it is also possible to clean raised edge strips, e.g. at transitions to walls, on stairs or on foot paths.

In addition, additional accessories are also available to purchase separately. A slightly softer nylon brush (“Soft”) for gentle cleaning and freshening-up of wooden surfaces and artificial grass, as well as a robust steel brush (“Ultra”) for intensive cleaning to remove stubborn dirt such as lichens from rough, hard-wearing stone surfaces.

The electronic speed control of the Picobella allows the cleaning intensity to be individually adapted to every surface. This allows vigorous cleaning of stone surfaces as well as gentle cleaning of wooden surfaces. Thorough wet cleaning is also possible thanks to the integrated garden hose connection. This can be done in a single, time-saving work step, without first having to soak the ground with water. In the process, the hose pipe is pushed through the guide on the additional carry handle, keeping it safely out of the way during the work.

PRESS RELEASE

The forward/reverse action of the brush achieves improved cleaning results, smooth brush guidance and makes sure you don't splash yourself while working.

Freedom of cordless operation for all

As part of the Power X-Change cordless system, the Picobella Cordless Surface Brush is compatible with all the battery packs in the series. This means that as soon as you have one Power X-Change battery in the home, all further tools can be purchased solo, i.e. without the cost of the battery and charger. The Cordless Surface Brush joins the ranks of the already over 130 tools and devices for the garden in the cordless range from Einhell.

About Einhell

Einhell is a leading manufacturer of state-of-the-art tools and equipment for the house and garden. By continuously expanding our innovative rechargeable battery platform Power X-Change, we are now already the market leader in the area of cordless tools and garden equipment. We set new standards in terms of the endurance, performance and safety of our products and inspire our customers by offering excellent value for money, first-class customer service and the freedom of cordless operation for all their DIY projects.
