

Power X-Change: Einhell presents first Cordless Table Saw

Landau an der Isar, January 27, 2021 – Cordless tool and gardening equipment manufacturer Einhell has expanded its range of Power X-Change cordless tools and added the first cordless table saw for flexible wood working. With two 18 V (= 36 V) rechargeable battery packs, this unit is ideal for both small hobby workshops and mobile tasks.

Flexible and always ready for action

A table saw is one of the most important tools in wood working, where it is used to cut pieces of hardwood and softwood to the required size for further processing. With the first cordless table saw in the Power X-Change cordless range, Einhell Germany AG now offers DIY workers unrivaled freedom of movement and allows them to work independently of where the nearest power supply is. Another advantage: All of the rechargeable battery packs are compatible across the entire battery platform of Einhell, which means they can currently be used in over 200 devices. No other supplier of tools and gardening equipment can beat this level of flexibility.

To optimize its use, the new Cordless Table Saw TE-TS 36/210 Li is equipped with a high-quality 210 mm carbide saw blade that has been specially designed for cordless saws. With an idling speed of 3,800 rpm, this powerful table saw is quickly and easily ready for use. Two 18 V Power X-Change batteries (recommended: at least 2.5 Ah) are combined using the power of twin-pack technology to deliver up to 2800 W.

Perfect equipment for a clean cut

The Cordless Table Saw TE-TS 36/210 Li is equipped with an angled stop that enables precise miter cuts from -60 to +60 degrees. Thanks to the sturdy and double-mounted parallel stop, consistent lengthways cuts are also no problem. This is particularly helpful for users who need to cut lots of small pieces of wood but don't want to have to measure up again every time.

The sturdy aluminum table is lightweight, torsion-resistant, and offers a smooth and easy sliding surface for the wood to move over. The size of the table can be increased flexibly by pulling out the width extension to make it easy to process workpieces of different sizes. This increases the right-hand cutting capacity to a maximum of 625 mm.

The saw blade is height-adjustable and can also be freely tilted to up to 45 degrees for miter cuts. The maximum cutting height is 70 mm at 90 degrees and 45 mm at 45 degrees.

PRESS RELEASE

The soft start function protects the motor and the gearing against damage. The extraction connections found on the housing and on the saw blade guard can be used to keep the working area clean and dust-free. Einhell offers matching wet and dry vacuum cleaners for this in its range of cleaning tools so that wood chips and sawdust can be reliably removed when cutting the workpiece.
