

## Carefully targeted plant care with the new Power X-Change Cordless Pressure Sprayer

Landau an der Isar, March 4, 2021 – The new 15 liter GE-WS 18/150 Li Cordless Pressure Sprayer from the Power X-Change platform of Einhell Germany AG adds a new, larger capacity unit to the two existing pressure sprayers GE-WS 18/75 Li and GE-WS 18/35 Li, which were already added to the range in the spring of 2020. These units can be used to deliver a uniform spray of e.g. pesticide, fertilizer, or weedkiller. Because they are battery powered, there is no need for laborious pumping to build up pressure by hand. And thanks to the padded double carrying straps, hobby gardeners will find it very easy to carry the unit on their back.

### New helper in the garden for plant protection

Last year, Einhell also widened the freedom of cordless operation to the area of plant care and plant protection, so that both flowers and shrubs can grow big and strong and be protected against pests. Two portable battery-powered units with a capacity of 7.5 liters and 3.5 liters have been in the range since. They are now followed by a larger model, the GE-WS 18/150 Li with a 15 liter tank, which can be comfortably carried on your back thanks to the padded carrying straps. This is a real advantage particularly for large gardens, with the far greater range meaning that hobby gardeners no longer have to refill the tank quite so often. Thanks to the controlled distribution of the liquid (in the form of liquid fertilizer, pest control products or weedkiller), frugal and efficient use is guaranteed. The automatic pump in the pressure sprayer is powered by an 18 V Power X-Change battery pack, so manual pumping is a thing of the past!

A scale is provided on the transparent tank so that hobby gardeners can always check the fill level at a glance, and with the large filler opening the process of refilling the tank is incredibly easy. Thanks to the lockable operating button, the liquid can be sprayed uniformly and comfortably without the user having to keep his or her finger on the button the whole time. Up to 102 liters per hour is distributed with a maximum pressure of 4.5 bar via the individually adjustable brass nozzle. The rechargeable battery is protected with a cover against water ingress and can also be used in all the other tools in the Power X-Change cordless platform, which already includes over 200 tools for the house and garden.

The new 15 liter Power X-Change GE-WS 18/150 Li Cordless Pressure Sprayer.
