

Einhell brings new cordless products for the workshop onto the market

Landau a. d. Isar, November 8th, 2021 – Addition to the Power X-Change battery family of Einhell Germany AG: A stapler/nailer and a paint sprayer expand the cordless product range of the tool and garden equipment manufacturer. The compact new additions are operated by an 18 V Power X-Change battery that can also be used in all other cordless tools of the platform.

The 2-in-1 combination tool: stapler and nail gun

Whether in the workshop, garage or handicraft room, the new TE-CN 18 Li battery-operated stapler / nailer is a small cordless helper that can be used wherever there is no available power source. The robust gearing allows up to 20 shots per minute, while the penetration depth can also be varied, allowing a copper sheet with a depth of up to 0.5 millimeters to be attached easily. The trigger catch prevents unintentional stapling or nailing. The slim nose also makes it easy to work on narrow edges. With a capacity of up to 100 nails or staples, the magazine is opened simply by pressing a button. A magnet in the magazine also ensures that the nails and staples are kept in place better. To enable the DIYer to get started straight away, 300 nails (32 mm) and 300 staples (5.7 x 19 mm) are included with the product.

Perfect paint application

The new TC-SY 18/60 Li 18 V cordless paint sprayer is ideal if you need to apply lacquers, glazes, washing and impregnating agents to small and medium-sized surfaces. With a capacity of 0.8 liters, up to 650 milliliters a minute can be sprayed without requiring a lot of effort. The paint container with scale markings makes it easy to see how much of the contents are still available, while the controllable volume regulator enables the user to decide for themselves how much paint to apply. The adjustable air cap allows a vertical, horizontal or round jet to be sprayed. The soft grip surfaces on the housing are pleasant to the touch and ensure a firm, steady grip. All paint-carrying elements are easy to clean thanks to the detachable spray head. In addition, the housing is designed to protect the battery from paint and lacquer. The device is supplied with two nozzles for different lac-
