PRESS INFORMATION

March 2022

The BBS CI-R is now available with ABE certification for the Tesla Model 3

Uncompromising. Aesthetic. Trend setting. BBS, the world's premier alloy wheel manufacturer now offers its CI-R high-performance wheel design in 8.5J x 19-inch LK ET36 5/114.3 dimensions with ABE certification for the Tesla Model 3 Type 003 (Model years 2019-2020).

Minimalist design, state-of-the-art technology, long range: The Tesla Model 3 is the world's best-selling pure electric car, with more than a million units sold to date. It has been on sale in Germany since 2019.

Now BBS offers the CI-R alloy wheel in 8.5J x 19-inch LK ET36 5/114.3 with ABE certification for the Tesla Model 3 Type 003 (Model Years 2019-2020) in three different surface finishes of Satin Silver Platinum, Satin Black, Satin Bronze, plus a special Nürburgring Edition.

With its distinctive Y-spoke design, this one-piece alloy wheel showcases core BBS technical competencies such as the weight optimisation techniques developed in the crucible of motorsport. The flow-forming process that BBS has perfected for road wheels combines low weight with improved material strength, while the optional BBS collision protection system keeps 'kerb rash' at bay and the wheels looking good for longer.

For more information on the BBS wheel programme and technologies: www.bbs.com.

BBS CI-R – Facts and Figures

Dimensions:	8.0J x 19 to 10.5J x 19-inch, 8.0J x 20 to 11.5J x 20-inch
Bolt patterns:	5 x 108 / 5 x 112 / 5 x 114.3 / 5 x 120
Finishes:	Satin Silver Platinum, Satin Black, Satin Bronze, Nürburgring Edition
Design:	One-piece, low-pressure cast, flow-formed, heat treated, weight optimised, varying offsets, replaceable BBS collision protection.
Applications & Certifications:	For many popular vehicles
Guarantee:	Five years

About BBS:

BBS is the world's best-known brand for alloy wheels. This is continuously confirmed by awards from leading German and international automotive trade journals. The company, founded in 1970 by Heinrich Baumgartner and Klaus Brand at the Schiltach site in the Black Forest, stands for numerous innovations and has developed numerous industry-defining designs in its more than 50-year history. Careful controls ensure the high quality of BBS products to this day, starting with low-pressure casting, flow forming and special heat treatment through to the surface finish. Each wheel produced is checked several times by BBS employees. Today's BBS automotive GmbH is part of the KW automotive group. In addition to the suspension manufacturer KW automotive with its brands KW suspensions, ST suspensions and ap Sportfahrwerke, these include the suspension manufacturers AL-KO Damping, Belltech and Reiger Suspension as well as the SimRacing brands TrackTime and Ascher Racing. With its immense product portfolio, KW automotive has been operating successfully in all markets for over 25 years.
