

Powerful and flexible – Cutting wood with the new cordless chainsaws from Einhell

Landau a. d. Isar, June 15th 2022 – To provide users with even more versatility in the use of chainsaws in gardens and woodland areas, Einhell Germany AG has added two new 18V cordless chainsaws to its Power X-Change range for the 2022 gardening season. The Fortexxa 18/30 cordless chainsaw is a reliable helper for hobby gardeners needing to cut down small trees or reduce the size of firewood. For trained tree care personnel, on the other hand, Einhell has developed the new Fortexxa 18/20 TH battery-powered chainsaw, which scores high marks with its cordless freedom, low noise and zero-emission operation.

High-quality components for clean cuts

Both the new Fortexxa 18/30 and the new Fortexxa 18/20 TH Power X-Change are cordless chainsaws which come equipped with a high-quality OREGON cutter rail and a high-quality OREGON chain. The chain can be tensioned and changed without tools and is lubricated automatically during use. Both new models can look forward to a particularly long working life not only because of the automatic chain lubrication function but also thanks to a high-performance motor that has no carbon brushes and so needs less maintenance. Other features include a large filler opening that makes it easier to top up with oil. Safety is maximized by kickback protection combined with an instant-reaction chain brake, a chain catch bolt and a stop claw made of metal. And with Softgrip surfaces on the handle there is an agreeable feel to operating these chainsaws. Compared to petrol-driven models, the new cordless chainsaws are lighter, quieter and easier to work with.

Benefits for hobby gardeners and professionals

The Fortexxa 18/30 cordless chainsaw assists the hobby gardener on his occasional tree care jobs. Cordless and independent, it can be used in gardens or woodland areas. The Fortexxa 18/30 features a 300-millimeter cutter rail and a cutting length of 270 millimeters. The chain speed can be varied to suit the application. You can switch between full power mode with a speed of 8.9 meters per second and eco mode with a speed of 6 meters per second. For optimum results it is recommended to use a Power X-Change battery with 4.0 Ah rating or higher.

PRESS RELEASE

The Fortexxa 18/20 TH user-friendly one-handed cordless chainsaw is a reliable assistant for trained tree care personnel needing to thin out or prune small to medium-sized trees, to prepare firewood, and to trim or cut up construction timber. It operates with a cutting speed of 7 meters per second. Positioning the main handle above the chainsaw makes it ideally balanced. The cutter rail is 200 millimeters long and the cutting length is 140 millimeters. A tip guard minimizes the risk of kickback, making it not only easier but also safer to cut a branch from underneath. Einhell recommends using a Power X-Change battery with 2.5 Ah rating or higher.

The Einhell Fortexxa one-handed cordless chainsaw was developed specially for trained commercial users.
