

PRESS RELEASE

Kirchheim, March 27, 2023

hubergroup Print Solutions presents its sustainable portfolio at PAMEX 2023

hubergroup Print Solutions, one of the leading international ink specialists, announced its participation at PAMEX 2023, which takes place from March 27 to 30 in Mumbai, India. At its stand, hubergroup will present its MGA (low migration and low odour) inks, which guarantee a maximum of safety and sustainability in food packaging. As a highlight, the ink specialist will also provide information about the recently launched series MGA FOOD NEWS and MGA EVOLUTION, which are the first web offset inks for food-compliant paper packaging. Furthermore, hubergroup will exhibit its eco-friendly non-food packaging inks such as RAPIDA ECO and ECO-PERFECT-DRY.

hubergroup's MGA portfolio includes, among others, the fast-setting sheet-fed series MGA NATURA, which is designed for the safe printing on the outside of food packaging, as well as the direct food contact series MGA CONTACT, which allows safe and vivid printing on the inside of paper and cardboard food packaging.

The newcomer series MGA FOOD NEWS and MGA EVOLUTION, on the other hand, are aimed at web offset printers who want to establish a new business with the printing of food packaging. These first low-migration and low-odour coldset and heatset inks to produce food-compliant paper packaging in large quantities using four-colour printing. Food manufacturers can thus make their packaging more colourful, for example, by reproducing their products true-to-life on it.

When it comes to non-food packaging, hubergroup will present its ink series RAPIDA ECO and ECO-PERFECT-DRY which both combine fast and sustainable printing. RAPIDA ECO is one of the fastest vegetable-based inks for sheet-fed printing available on the market. ECO-PERFECT-DRY convinces through the combination of fast setting with high resistance, mechanical stress, and eco-friendliness.

The hubergroup team at PAMEX will be happy to advise visitors on which series best suits their requirements. You will find the company at stand no. C46, Hall1 at the Bombay Exhibition Center.

About hubergroup

hubergroup is an international printing inks and chemicals specialist based in Germany with a 255-year history. Within its two divisions, the company develops innovative, sustainable products and services to enable its customers first-class results. The Print Solutions Division produces inks, varnishes, and printing aids for packaging, commercial, and newspaper printing. In addition, the associated subsidiary Gleitsmann Security Inks manufactures security inks. The Chemicals Division produces speciality chemicals such as resins, lamination adhesives, pigments, and additives in its facilities in India. hubergroup employs about 3,500 people in nearly 30 countries and generated an annual turnover of about €704 million in 2021.
