Special mention for the world's most UV-resistant GRP face sheet

## **LAMILUX SUNSATION® wins German Innovation Award**

**LAMILUX SUNSATION®, the innovative gelcoat technology, has impressed the renowned jury of the German Innovation Awards for the second time. After last year's "Winner" award, LAMILUX SUNSATION® has now also won the "Special Mention" in the "Excellence in Business to Business - Materials & Surfaces" category.**

In 2022, Europe's leading manufacturer of fibre-reinforced composites, LAMILUX Composites, presented LAMILUX SUNSATION®, the world's most UV-resistant GRP face sheet and one of the most revolutionary developments in the world of glass fibre-reinforced plastics.

### **Remarkable innovation**

Extreme colour and gloss retention and no colour difference when removing decals from surfaces: LAMILUX SUNSATION® sets a new benchmark in the quality standard of glass fibre-reinforced plastics. In artificial weathering tests, such as according to DIN EN ISO 4892-2, LAMILUX SUNSATION® demonstrates absolute resistance. Even after 15 to 20 years of real weathering, LAMILUX SUNSATION® retains its rich colours and maximum gloss. The results of the tests confirm the revolutionary development for GRP exterior applications.

The ultimate plus: LAMILUX SUNSATION® significantly reduces the care requirements of exterior applications. Surfaces that do not dull and do not lose their gloss do not need to be waxed for preventive protection or subsequent
