

Brand new: Six new online presentations on GRP

LAMILUX webinar dates for the second half of 2023

LAMILUX Academy's educational webinars have been a firmly established component in the GRP industry for three years now and are extremely popular. Since the beginning of the year, interested parties have been able to learn about GRP solutions from LAMILUX Composites in a range of monthly online lectures. Six brand-new online presentations will soon be available for the second half of 2023. Besides product innovations and industry-specific knowledge, the GRP experts will also provide participants with useful information on the processing and handling of glass fibre-reinforced plastics.

Each webinar has a specific focus, presented in an easily understood manner. Experts from various LAMILUX Composites departments could once again be confirmed as speakers for the second half of 2023.

Participants can look forward to the following LAMILUX Academy webinars:

About LAMILUX Composites GmbH

LAMILUX Composites GmbH has been producing fibre-reinforced plastics for around 70 years. The medium-sized company is the leading European producer thanks to its technologically advanced continuous production process, large manufacturing capacities and wide product range. LAMILUX supplies customers around the globe in a wide range of sectors, such as the building industry, the automotive and recreational vehicle sectors, refrigerated store room and cell construction, and many other industrial sectors. LAMILUX strives to be the innovation and performance leader in all areas relevant to its customers. Headquartered in Rehau, Germany, the family-owned company is managed by Johanna and Dr. Alexander Strunz in the fourth generation, currently employs around 1,300 people, and in 2022 generated sales of around 392 million euros.
