

**PRESS RELEASE**

Kirchheim, January 23, 2024

**Designed in Germany – Made in India**  
**hubergroup Chemicals presents its portfolio at PaintIndia**

**hubergroup Chemicals, one of the largest manufacturers in the chemical sector, will showcase its state-of-the-art portfolio of resins, colourants and pigments, laminations adhesives and monomers at PaintIndia in Mumbai, India, February 22-24, 2024. In addition, hubergroup Chemicals will present its capabilities in custom manufacturing. A particular focus will be placed on inks & over-print varnishes, and industrial coatings. Sustainability and environmental protection are an integral part of the daily business. All interested parties are cordially invited to visit stand E5 in hall 1.**

At PaintIndia, the premier trade fair in Asia and the third largest show worldwide for the paint, coating, and related industries, hubergroup Chemicals will showcase its comprehensive, state-of-the-art portfolio. This includes sustainable raw materials for industrial coatings such as radiation-curing oligomers and monomers for industrial coatings as well as conventional drying resins based on rosin, ketonic resins and polyurethane resins as well as some additives. The chemical specialist will also be presenting its state-of-the-art laminating adhesives, which are already being used by many satisfied customers on the Asian market. The portfolio also includes raw materials for printing inks and overprint varnishes such as resins, additives, and colourants.

In addition to these high-quality standard products, hubergroup Chemicals also offers custom manufacturing for tailor-made products. The focus here is on three core competencies. The diversified chemical expertise that is also reflected in the portfolio in the many different product groups. The formulation know how – especially for inks & over-print varnishes – which the chemical experts of the hubergroup offer to their customers as a consulting service. The project management style with which custom manufacturing contracts are successfully implemented for each customer individually.

Numerous experts from hubergroup Chemicals will be on site at PaintIndia to provide visitors with advice, recommend the right products, discuss legal requirements as well as product safety and give tips on how to make chemical processes more efficient.

For hubergroup Chemicals, India is an important growth market with its own production facilities and laboratories. hubergroup Chemicals was launched in 2020 as a division of the international chemicals and printing inks specialist hubergroup, which unites around 3,300 people in almost 30 countries and has a unique history of over 255 years. To date, hubergroup Chemicals has developed into a major chemical supplier that sells its products to all over the world, in all business areas and to customers ranging from SMEs to large, world-renowned chemical companies.

In particular, hubergroup Chemicals concentrates on the customized manufacturing and development of radiation curing oligomers, polyurethane resins, ketonic resins, adhesion promoters, rosin based resins, laminating adhesives (2K PU systems), and pigment concentrates.

With its proven expertise in the printing ink business, hubergroup Chemicals has developed into an expert in the field of raw material production in recent years and has steadily expanded its portfolio. Based on its extensive production capacities of almost 300 kilotons and over 100

reactors, hubergroup Chemicals is one of the largest manufacturers in the chemicals sector. Dedicated experts enable advanced product developments in the research departments in India and Germany. hubergroup Chemicals has two production plants in India and research departments in India and Germany, that work closely connected on the latest innovations - with more than 20 new product launches every year.

Customer-focused and agile, hubergroup Chemicals reacts quickly to new market needs by developing new products or adapting existing ones. It thus offers its customers and other chemical companies the unique opportunity to establish themselves quickly, reliably, and sustainably in the fast-growing Asian chemical market.

Taner Bicer, President of hubergroup Chemicals, says: "India and the Asian market are of great importance to us and our customers. hubergroup Chemicals has major production facilities in India, is the largest UV oligomer producer in the country and a local leader in terms of pigment synthesis capacity. We are proud to develop the latest innovations with numerous experts in India and present them in Mumbai at PaintIndia."

"PaintIndia is a great opportunity to meet customers and interested visitors in person. Part of our identity is that we share our knowledge and support our customers in their individual challenges. We have experts in every field. Interested parties are cordially invited to visit our stand - we look forward to meeting you and having exciting conversations!" adds Suresh Kalra, Managing Director India & President Asia, hubergroup.

You will find hubergroup Chemicals in Hall 1, Stand E5, in the vicinity of Thos, Evonik, Arkema and Omya.
