## ots.Audio: BASF Podcast: The Chemical Reporter - What happens to film when it is developed?

Ludwigshafen (ots) -

Nowadays, most of us have a digital camera. In this case you wouldn't even ask such a question. You just print out the pictures. Developing pictures through classic photography is a bit more complicated. In entertaining weekly episodes our Chemical Reporter answers questions of our Podcast listeners on Chemistry in our everyday life.

BASF is the world's leading chemical company: The Chemical Company. Its portfolio ranges from oil and gas to chemicals, plastics, performance products, agricultural products and fine chemicals. As a reliable partner BASF helps its customers in virtually all industries to be more successful. With its high-value products and intelligent solutions, BASF plays an important role in finding answers to global challenges such as climate protection, energy efficiency, nutrition and mobility. BASF has more than 95,000 employees and posted sales of almost EUR58 billion in 2007. BASF shares are traded on the stock exchanges in Frankfurt (BAS), London (BFA) and Zurich (AN). Further information on BASF is available on the Internet at www.basf.com.
