BASF Podcast: The Chemical Reporter - What is dry-cleaning?

Ludwigshafen (ots) -

When a shirt gets dirty, you usually just have to chuck it in the washing machine, add a little laundry detergent, and let the combination of water and soap do the rest. But some pieces of clothing are too delicate to put in there. As the name implies, dry-cleaning doesn't use any water - or any soap, for that matter. In entertaining episodes our Chemical Reporter answers questions of our Podcast listeners on Chemistry in our everyday life.
