BASF Podcast: The Chemical Reporter - Why is it sometimes so hard to get ketchup out of the bottle?

Ludwigshafen (ots) -

Ketchup can be a stubborn condiment. Just when you're ready to bite into a burger, it often refuses to flow. Only when you give the bottle a serious shake or two does it start to move. And there's a reason why. Ketchup isn't your normal, everyday liquid. In entertaining episodes our Chemical Reporter answers questions of our Podcast listeners on Chemistry in our everyday life.

BASF is the world's leading chemical company: The Chemical Company. Its portfolio ranges from chemicals, plastics and performance products to agricultural products, fine chemicals as well as oil and gas. As a reliable partner BASF helps its customers in virtually all industries to be more successful. With its high-value products and intelligent solutions, BASF plays an important role in finding answers to global challenges such as climate protection, energy efficiency, nutrition and mobility. BASF has approximately 97,000 employees and posted sales of more than EUR62 billion in 2008. BASF shares are traded on the stock exchanges in Frankfurt (BAS), London (BFA) and Zurich (AN). Further information on BASF is available on the Internet at www.basf.com.
