## **BASF Podcast: The Chemical Reporter - Why does silver inhibit bacterial growth?**

*Ludwigshafen (ots) -*

Lots of products out there capitalize on the antibacterial effects of silver. Everything from cleaning cloths and insoles to washing powder and bandages - they all seem to employ the element in some way. Unfortunately, silver can't really perform miracles. But it can be used quite effectively to control bacteria. In entertaining episodes our Chemical Reporter answers questions of our Podcast listeners on Chemistry in our everyday life.

BASF is the world's leading chemical company: The Chemical Company. Its portfolio ranges from chemicals, plastics and performance products to agricultural products, fine chemicals as well as oil and gas. As a reliable partner BASF helps its customers in virtually all industries to be more successful. With its high-value products and intelligent solutions, BASF plays an important role in finding answers to global challenges such as climate protection, energy efficiency, nutrition and mobility. BASF posted sales of more than EUR62 billion in 2008 and had approximately 97,000 employees as of the end of the year. BASF shares are traded on the stock exchanges in Frankfurt (BAS), London (BFA) and Zurich (AN). Further information on BASF is available on the Internet at [www.basf.com](http://www.basf.com).
