PRESS RELEASE Vienna, September 15th, 2009

The global market for disposable examination gloves is growing continuously. In order to satisfy the increasing demand and to pave the way for further growth, Semperit has finalised plans to build a new production facility for this segment in Surat Thani, Thailand.

The state-of-the-art plant and its equipment will be designed according to the latest know-how in production and manufacturing technology. The total investment will amount to approximately 25 million euros and will permit additional capacity of roughly 3 billion pieces per year at the end of the first stage of expansion.

This new production facility will be integrated into the existing joint venture Siam Sempermed and will be operated in conjunction with proven partner Sri Trang Agro Industry.
