Raytion Announces the Immediate Availability of its complete Enterprise Search Connector Family for Microsoft SharePoint 2013

Düsseldorf (ots) -

Raytion, the internationally operating IT business consultancy and specialist in enterprise search and content integration, has launched its complete family of connectors for Microsoft SharePoint 2013 Search.

The Raytion SharePoint 2013 connectors allow customers to index content from a variety of sources, making it available to all search features of SharePoint 2013. The connectors integrate natively with SharePoint 2013's custom security trimming.

While the Raytion SharePoint 2013 Connectors were already available for content sources with Active Directory security, they now extend the support to sources based on other security models.

The following connectors are currently available:

- Atlassian Confluence
- EMC Documentum
- EMC Documentum eRoom
- IBM Connections
- Java Content Repository (JCR)
- Microsoft Exchange
- Microsoft SharePoint
- Open Text Livelink WCM
- Oracle WebLogic Portal
- Pironet NDH pirobase CMS
- PST File
- SAP ERP
- SAP NetWeaver Portal
- SAP PLM DMS
- Symantec Enterprise Vault
- Xerox DocuShare

More information about the Raytion enterprise search connectors can be found at www.enterprise-search-connectors.com.
