## EANS-News: ANDRITZ to equip new hydropower station in Pakistan

Corporate news transmitted by euro adhoc. The issuer/originator is solely responsible for the content of this announcement.

### Company Information

Graz/Vienna, February 3, 2016. ANDRITZ HYDRO, part of international technology Group ANDRITZ, has received an order from Daelim Lotte Joint Venture to supply the electromechanical equipment, hydraulic steel structures, penstocks, and control systems for the Gulpur hydropower station, Pakistan. Start-up is scheduled for mid-2019. The order value amounts to approximately 65 million euros.

ANDRITZ HYDRO is to supply two turbine generator sets, each with an output of 52 megawatts, for a head of 57 meters to the new hydropower station on the Poonch River in northwestern Pakistan. Due to the high sand content in the river water and the resulting severe abrasion, the Kaplan turbines will be protected by the highly resistant ANDRITZ HYDRO SXH coating. Another special feature: The runner blades and guide vanes of the turbines can be replaced quickly and easily without disassembling the turbines.

Press release available for download

The press release is available for download at [www.andritz.com/news](http://www.andritz.com/news).

### The ANDRITZ GROUP

ANDRITZ is a globally leading supplier of plants, equipment, and services for hydropower stations, the pulp and paper industry, the metalworking and steel industries, and for solid/liquid separation in the municipal and industrial sectors. The publicly listed technology Group is headquartered in Graz, Austria, and has a staff of almost 25,000 employees worldwide. ANDRITZ operates over 250 sites worldwide.

### ANDRITZ HYDRO

ANDRITZ HYDRO is one of the leading global suppliers of electromechanical equipment for hydropower plants. With over 170 years of accumulated experience and more than 30,000 turbines installed, totaling approximately 420,000 megawatts output, the business area provides the complete range of products, including turbines, generators, and additional equipment of all types and sizes - "from water to wire" for small hydro applications to large hydropower plants with outputs of more than 800 megawatts per turbine unit. ANDRITZ HYDRO is also well positioned in the growing modernization, refurbishment, and upgrade market for existing hydropower plants. Pumps (for water transport, irrigation of agricultural land, and applications in various industries) and turbo-generators for thermal power plants are also allocated to the business area.
