- > Extremely strong contribution to earnings from Fast Forward program: EUR 25 million

#### Outlook for 2019

- > Annual guidance focused on strong EBITDA growth
- > EBITDA target for 2019 at EUR 570-580 million
- > Further investments in future-oriented solutions

Vienna, August 13, 2019 - The Wienerberger Group, a leading international supplier of innovative solutions for the building envelope and smart infrastructure, consistently pursued its value-creating growth strategy throughout the first half of 2019 and set new records in terms of revenues and earnings. "During the past six months, our strategic projects advanced rapidly" says Heimo Scheuch, Chairman of the Managing Board. The company's performance-enhancing Fast Forward program made excellent progress. Moreover, through the timely integration of acquisitions in Great Britain and Belgium, Wienerberger was able to further strengthen its position in strategic core markets.

"Altogether, these developments translated into the best mid-year result ever achieved in the 200-year history of our company. We are thus fully on track to meet our ambitious targets for 2019 as a whole", emphasizes Heimo Scheuch, taking stock of the first six months of the year.

In the first half of 2019, Wienerberger generated an 8% increase in revenues at Group level to EUR 1,736 million, up from EUR 1,607 million in the comparable period of the previous year. The main contributors to this positive development were high-quality system solutions. Compared to the first half of 2018, EBITDA LFL grew by 33% to EUR 287 million (after EUR 215 million in 2018). The Fast Forward program delivered a noteworthy contribution to earnings of roughly EUR 25 million. The Group's net profit more than doubled from EUR 53 million to EUR 127 million in the first half of 2019.

#### Revenue growth in all Business Units

In the first half of 2019, Wienerberger generated revenue growth in each of its three Business Units. With revenues up by 10% to EUR 1,074 million and an improvement in EBITDA LFL by 37% to EUR 219 million, Wienerberger Building Solutions delivered an outstandingly strong performance. For Wienerberger Piping Solutions, the enhancement of the product mix and the optimized cost position resulted in growth in revenues (+4% to EUR 497 million) and earnings (EBITDA LFL up by 47% to EUR 52 million). The North America Business Unit reported a 10% increase in revenues to EUR 165 million, while EBITDA LFL came to EUR 16 million (after EUR 19 million in 2018).

#### Strengthened position as a provider of system solutions

The first half of 2019 was marked by great success in Wienerberger's efforts to transform its product range through a strong focus on smart and resource-efficient system solutions. Almost one third of the Group's total revenues is already being generated by innovative solutions and services. These range from digitally designed, prefabricated wall elements to tailor-made electrical

solutions for buildings to innovative building materials and smart solutions for meeting the challenges of climate change. Our Raineo system, an intelligent solution to cope with the increasing frequency of flooding in urban areas, is an excellent example. "We are thus shaping the future of building construction, renovation and infrastructure and, at the same time, contributing toward improving the ecological balance of the construction industry", emphasizes Heimo Scheuch.

#### Outlook for 2019

Despite current factors of uncertainty, Wienerberger anticipates largely stable to slightly growing demand in its core markets. Regardless of increasing market volatility, Wienerberger will continue to grow. "Based on the outstandingly strong performance of the first half of the year, our outlook for the second half is extremely optimistic and we can therefore specify our forecast for EBITDA LFL of EUR 570 to 580 million (previously EUR 560 to 580 million) for 2019", says Heimo Scheuch.
