Brenntag Food & Nutrition announced as exclusive distribution partner for Cargill Salt in Europe

Cargill has appointed Brenntag Food & Nutrition as the exclusive distribution partner for its salt offering in Europe. While the company already distributes a broad range of Cargill products in Europe, including salt, the expansion of the partnership broadens Brenntag's offerings to include specialty salt products like Microsized(TM) Extra Fine Salt, Premier(TM) Flake Salts, Cargill(TM) Sea Salts, Potassium Pro(TM) Potassium Chloride Products and the unique Alberger(TM) Flake Salts.

Frank Haven, Vice President Brenntag Food & Nutrition EMEA explains: "Cargill is the only Food company producing food grade salt and offering a unique solution for salt reduction without the complexity of additional ingredients. We are delighted to be named Cargill's exclusive distributor for their excellent salt offering. Brenntag Food & Nutrition is the ideal partner to support Cargill in increasing their footprint in the market even more. Our teams have the expertise and understand the market specific needs and challenges to create smart solutions that turn trends into marketable products and target specific consumer groups."

"It is very common for our customers to have a presence on multiple continents. Cargill Salt needs an industry-leading distributor in Europe to provide expertise with salt ingredients, one-stop convenience, regulatory support, flexible lead times and minimum order quantities," said Dana Craig, Cargill Strategic Market Director for Food Salt. "With Brenntag's deep market knowledge in the region, together with its facilities and capabilities, we're confident that Brenntag Food & Nutrition can deliver on our expectations, bringing added value to our customers."

One of the key factors in meeting consumer demand is choice. With this partnership, Brenntag's Food & Nutrition Application and Development centers have access to a broad range of exclusive specialty salts to develop customer specific formulations, working together to choose the right ingredients for product optimization and new product development.
