TOP SECRET! - U.F.O. starts today with a top secret "Time" drive. Who is coming to Mars?

Palo Alto, Berlin, Golden Hearts Never Die City (ots) -

The race to Mars has begun. Visionaries Jeff Bezos, Richard Branson and Elon Musk are working on this concept.

Now, it is certain: The German visionary, inventor and watch designer Heiko Saxo wins the race! With his new watch invention, the time curve "arches".

The trip to Mars overcomes all the efforts of competitors and significantly reduces the distance. Time travel becomes a pleasure. The Indefinable Flight Object accompanies Heiko Saxo through space and time.

Already in his childhood the universal genius created various objects with flight units. Today it is patented motors in wristwatches.

According to Saxo, the U.F.O. Time drive is a special formula in his brain.

Corona, Brexit, parliamentary elections, poverty, refugees, environmental destruction, violence and corruption are raging on earth. Anyone who is afraid of lingering on earth or is looking for a new perspective should fly to Mars!

GIGA GAGA - Golden Hearts Never Die City - First settlement on the red planet! Once on Mars, Saxo plans the first culture and motorsport base. "There are no viruses here - just Auto Motor and Sport, Gaga and other intergalactic STARS sing here."

"Ecclestone" is to be the name of the looping unit on the Space Circuit and will inspire racing.

According to calculations by Heiko Saxo, the racetrack will set groundbreaking records with steep magnetic curves and hypergenetic plasma impulses. At an average of minus 50 degrees, the newly developed drives of the "vehicles" of all car brands can tremble. The Olympic flame will be lit for the test winner and the red planet will be heated up properly!

Heiko Saxo sees Elon Musk at the top. "Like a spaceship, the TESLA Arche will float weightlessly with zero emissions!"

According to the planning and the concept of Heiko Saxo, the only approx. 8 km long race track will be built around the core of the settlement with the cultural center, theater and sound studio as well as the unlimited organic garden as an energy wing.

Will Heiko Saxo's fiction be realizable despite all earthly obstacles?

Yes, with the funds of the competitors on the way to Mars. The Special Ambassador of Mobile Culture Dr. h.c. Heiko Saxo starts today with his U.F.O. and will personally greet the first visitor to the red planet in the future. The mobile dream of mankind

becomes reality. In shapes, colors, tones and fragrances. Saxo's architectural drawings accompany him on the long journey.

On Mars: "Only with a distance to the blue planet - the cradle of life, of all dreams and confidence - can evolution celebrate the continued existence and the earth be reconstructed!" says Heiko Saxo
