## Image of the month: Mother's Day—watches like mom!

**Image of the month: Time for mom!** Flowers, chocolates – or how about a good watch? May 9 is Mother's Day and deserves suitable recognition. After all, being a parent is not an easy task. Helping with schooling is only one part; preparing children for adult life can mean being a cheerleader, role model, and shoulder to cry on, all rolled into one. Even when the kids leave the nest and enter their own independent lives, mom never gets taken off speed dial. And being a parent is often just one of many roles in a women's life.

Take a moment to celebrate mom this Mother's Day with something that will last for a lifetime – such as a watch from NOMOS Glashütte. Our mechanical wristwatches are crafted in-house start from 1,060 euros. Here: Orion 33 duo with manual winding.

Would you like to see more images of beautiful watches? Do you want information about how we produce our timepieces? Or can we help you with anything else? We'll try our very best – just like parents always do.
