The Latest in Memory Technology Trends from TechInsights and Jeongdong Choe

Ottawa, ON (ots) -

--News Direct--

TechInsights announces that Dr. Jeongdong Choe will be presenting a webinar titled: Memory Technology Highlights from TechInsights 2021. Two broadcasts are scheduled for June 29th; the first at 6am UTC, and the second at 3pm UTC.

Due to strong - and growing - demands for memory chips from the storage, mobile, and AIOT markets, major memory players are striving to increase density and performance, reduce manufacturing cost, and develop new and innovative technologies for each generation. TechInsights has been tracking down and digging into them, including technology trends and innovative process and design changes on DRAM, NAND Flash, and emerging memory devices such as STT-MRAM, ReRAM, FeRAM and 3D XPoint Memory.

Dr. Jeongdong Choe, one of the world's foremost experts on advanced memory technology devices, will provide an overview of the latest developments from Samsung, Micron, SK Hynix, Western Digital, KIOXIA, YMTC, Intel, Sony, and others.

With so much disruptive technology entering the market in recent days - for example, the 112L Kioxia/WD NAND Flash, the 2nd Gen Intel X-Point die, and the Micron Z41C die (1st sub-15 nm DRAM) - this is sure to be a well-attended event.
