CYBER SECURITY ENHANCED: NTT DATA BUSINESS SOLUTIONS AND SECURITYBRIDGE EXTEND THEIR PARTNERSHIP

Bielefeld and Ingolstadt, Germany (ots) -

NTT DATA Business Solutions AG and SecurityBridge are expanding their strategic partnership. In the course of the collaboration, NTT DATA Business Solutions is integrating SecurityBridge's security platform, which is tailored to SAP systems, into its range of SAP solution software. This will benefit the customers of the globally most successful SAP consultants for the SME sector through enhanced cyber security and fail-safety of their systems. The two IT service providers have already been working together in the North-European market since 2019. This cooperation is now being expanded globally.

"The expansion of our partnership with SecurityBridge is an important step in complementing our portfolio. It will help us strengthen our position in a dynamic market environment and underpin our leading role as SAP Partner," said Nicolaj Vang Jessen, EVP, Global Innovation & IP, Global SAP Alliances & Region NEE, NTT DATA Business Solutions AG.

With the SecurityBridge platform, NTT DATA Business Solutions offers enhanced functions and applications for continuously monitoring, improving, and maintaining the security posture of the user's SAP landscape. Security alerts are transmitted in real time, allowing an immediate response. The platform's automation functions reduce manual effort for the customer's SAP department and make for a more reliable and accurate output.

"The partnership with NTT DATA Business Solutions allows us to bring the added value of our integrated and holistic SAP security solution, the SecurityBridge platform, to many SAP customers. In this way, we improve resilience against cyber-attacks on critical SAP applications," adds Christoph Nagy, CEO of SecurityBridge.

About SecurityBridge

[SecurityBridge](#) is a software vendor headquartered in Ingolstadt (Germany) and several international locations. In response to the ever-increasing threat posed by cyber-attacks, the eponymous SecurityBridge platform offers an attractive and effective security solution for SAP customers. The software platform, which is fully integrated into SAP, detects cyber-attacks at an early stage and reliably defends against them. In addition to monitoring, the SecurityBridge platform offers in-depth analysis tools to detect not only insecure configuration and missing security updates, but also vulnerabilities in customers' own SAP developments.
