Solarity - experts in solar systems on their mission to make the world a better place

Prague (ots) -

The application of solar energy has not only become an increasingly common topic of conversation among end users, but also among companies that supply and install them and who want to guarantee the supply of high-quality solar systems to their clients. To be able to count on a business partner that provides not only highly reliable photovoltaic systems from world-renowned brands, but that also offers a wide range of benefits is therefore of key importance.

Cutting-edge technologies and professional tailor-made services for your projects

Solarity has been operating on the market as a distributor and wholesale dealer of photovoltaic systems for over 10 years. Our experience in this field is next to none, which means we are well placed to cover the needs of all companies looking for a professional supplier of photovoltaic systems. Solarity can provide the following items for both on-grid and off-grid solutions:

- **solar panels;**
- **inverters;**
- **battery storage systems;**
- **charging stations;**
- **mounting systems;**
- **other accessories.**

Our primary goal - to provide high-quality photovoltaic systems - is evident from the range we offer from world-renowned manufacturers, such as Canadian Solar, Jinko Solar, Q CELLS, Phono Solar, Solar Edge, Fronius, SMA, Huawei, SolaX Power, Tigo or K2 Systems. Our expertise is also guaranteed by our team of international experts in the field of photovoltaic systems who operate in more than 30 countries.

It goes without saying that we also provide premium logistics services all over the world. Customers can rely on us to inform them about the progress of their order and the expected time of delivery.

Partnership based on trust

The collaboration with our suppliers is always based on a high level of professionalism. Of profound importance to us are mutual trust and the setting of well-defined goals and a joint path to fulfilling them in line with the customer's wishes. Solarity also prides itself on its open and flexible communication throughout the entire period of collaboration. Where necessary, local technical support is always available.

Customised financing for your project

Irrespective of whether you are planning a project in the order of kilowatts, or more extensive collaboration in the order of megawatts, Solarity will help you with customised financing solutions. Customers can therefore opt for the path that is the most acceptable to them.

Benefits for loyal customers

As with long standing friendships, the Solarity Partner Programme offers loyal customers a number of benefits, such as special prices and exclusive offers, including welcome packages, preferential prices, free-of-charge training, invitations to VIP events or factoring.

Knowledge transfer through seminars and training sessions

To expand the know-how of its partners, Solarity prepares training sessions and seminars focused on the field of solar systems. Solarity firmly believes that the only way to keep up to date on the latest technologies and available options is to facilitate the transfer of knowledge from leading manufacturers of photovoltaic systems, key partners and other experts..

Responsibility for the environment and communities

Sustainability is one of Solarity's key values, which is reflected in all our activities, including our relationship with employees. Within the framework of corporate social responsibility (CSR), Solarity takes part in projects focused on environmental protection, the improvement of working conditions, and support for local communities.
