Telos “Mission” NFT Challenge - 175,000 in Crypto Prizes!

New York, New York (ots) -

--News Direct--

[Telos Blockchain](#) (ticker: TLOS) presents its “Mission NFT Challenge” for digital graphic creators, offering a very attractive prize pool to be shared among contest winners. Telos believes that NFTs are both an art form and a pivoting technology that should be easily and affordably accessible to the masses. As such, Telos strives to facilitate the lowest barrier of entry into the emerging field of NFTs. Utilizing Byt.io, the latest leading NFT marketplace to integrate Telos, end-users will mint and trade their NFTs at unprecedented fast speeds while enjoying industry-low gas fees. The Telos EVM will also offer a congestion-free minting experience that leaves [no carbon footprint](#) or any of the [front running / MEV](#) that constantly plagues Ethereum users.

Furthermore, contract deployment is a fraction of the cost and significantly faster on Telos when compared to virtually every other network, making it a far superior ecosystem to build on. Transactions are instant on Telos!

Some Contest Details:

- The contest opens for registration on Monday May 9th, 12:00 pm EST and participants can submit their projects by Friday, June 24th, 12:00 pm EST.
- Public Voting on the submissions will take place between Monday May 23rd, 12:00 pm EST to Thursday, June 30th, at 12:00 pm EST.
- Twenty finalists will be announced on Friday July 1st, 12:00 pm EST and the top five winners will be selected and announced on Tuesday July 5th at 11:00 am EST.
- Telos encourages all digital artists and aspiring NFT projects to compete in this contest to win one of 5 prizes worth 25,000 TLOS each. Furthermore, an honorable pick by The Big Gooley, Telos’ in-house NFT curator, will award one winner with an additional 50,000 TLOS.
- The contest and voting will be hosted on the Taikai platform (also built on telos), which recently completed a very successful hackathon for the Telos Ignite contest. The public will vote on all submissions to select the top 20 projects after which a panel of judges will decide on the top five.
- This maiden NFT contest is inviting artists to bring their NFT projects (ERC 721) and deploy them on the tEVM where they can be minted to be sold on the Byt marketplace or other secondary markets.

All additional details and criteria can be found on the Taikai platform through the following link: <https://taikai.network/en/telos-foundation/hackathons/nftpl-slug/overview>

About Telos

Live since 2018, Telos Blockchain (ticker: TLOS) is a third-generation smart contract platform that offers compatibility with Solidity, Vyper, and Native C++ smart contracts. Telos provides full EVM/Solidity support with fixed low-cost gas fees and no front running and, more uniquely, offers a path to fee-less transactions via its robust native C++ smart contract support. Even while operating as a Net Zero Blockchain, Telos still sustainably supports hundreds of millions of transactions per day, produces blocks in 0.5 second intervals (on a first-in-first-out basis, eliminating front running on the network), and securely validates transactions via a credibly neutral and globally decentralized block producer network. As a result, the Telos blockchain has the throughput needed to facilitate and scale the thriving Metaverse / Web 3.0 landscape better than any other blockchain in existence. Its performance is unrivaled in the industry and was purpose-built to offer speed, scalability, cost-effectiveness, credible decentralization, and end-user fairness. Telos harnesses its power by utilizing tight C++ on the frontend and a custom WASM runtime environment on the backend.

About The Foundation

The Telos Foundation is a Decentralized Autonomous Organization established as a promotional and funding body to advance the Telos Blockchain Network and provide support to network applications.
