GameChange Solar to Showcase the Value Add of its Genius Tracker Power Performance Enhancements at Intersolar Europe

Norwalk, CT (ots) -

GameChange Solar, a leading global supplier of solar trackers and fixed-tilt racking systems, is set to make a splash at Intersolar Europe, the premiere exhibition for Europe's solar industry beginning June 19 in Munich.

Our mission is clear: make solar energy more affordable through cutting-edge innovations that maximize energy production. This year, we shine the spotlight on the Genius Tracker(TM), a standout solar tracker that has helped GameChange Solar rank among the top three tracker companies worldwide. One key to its success is its power performance enhancements.

SmartStow provides energy gains of up to 3.15% over a 45-degree stow and 0.73% over a 0-degree stow. It intelligently positions tracker tables to withstand high winds, adjusting angles to balance efficiency and safety as wind speeds rise.

PowerBoost adds up to 5.49% yearly energy gains. This smart algorithm optimizes solar plant production during backtracking by eliminating row-to-row shading and dynamically adjusting tracking angles to optimize energy production based on site topography.

WeatherSmart boosts energy gains by 6.02% during overcast days by stowing tables flat to capture more diffuse light - a feature that has captured industry interest.

"Our proprietary algorithms, validated by comprehensive analysis and third-party data, are proven to maximize energy generation, a top priority for every solar project owner," said Derick Botha, Chief Commercial Officer at GameChange Solar.

Join us June 19-21 at booth **A6.520** for an opportunity to see the Genius Tracker in action in our in-booth demo room.

About GameChange Solar

GameChange is a leading global provider of solar tracker solutions used in utility-scale and ground-mounted distributed generation solar projects around the world. We have delivered over 30 GW of solar tracker and fixed tilt systems that combine fast installation, bankable quality, and unbeatable value through superior engineering, innovative design, and high-volume manufacturing. Our products enable solar panels at power plants to follow the sun's movement across the sky and optimize plant performance while protecting the array from damaging weather conditions.

GameChange Solar is headquartered in the US, with regional offices, factories, and service/training centers in Spain, Brazil, Chile, Argentina, South Africa, UAE, Saudi Arabia, India, Australia, and China.
