Technological Breakthrough: Hallucination-Free Superintelligence Achieves 99.99% Strategic Accuracy - Germany Gains Permanent Strategic Superiority

Worms (ots) -

The mAlnthink GmbH has achieved a **technological breakthrough** that redefines the future of strategic decision-making: With the development of StratePlan, a hallucination-free superintelligence delivering **verified 99.99% strategic accuracy**, Germany secures **permanent technological, economic, and geopolitical superiority** - operationally deployable and scientifically validated.

This revolutionary system is the result of **over 15 years of dedicated** research and development by **Dr. Igor Kadoshchuk**, Chief Technology Officer and Head of Scientific Development at mAlnthink GmbH. His vision: to bring strategic thinking to a new level of machine precision. Today, that vision has become reality.

At its core, StratePlan orchestrates a **continuous competition between five autonomous high-performance algorithms**. Acting as a supervisory intelligence, StratePlan analyzes their outputs in real time, selects the most effective course of action, or fuses multiple inputs into one precisely calibrated master strategy - capable of operating under extreme complexity with exceptional clarity.

Key performance features:

- **Zero hallucinations**
- **No strategic ambiguity**
- **Documented 99.99% decision accuracy**

"We didn't simulate intelligence - we operationalized it. The system's architecture, competitive design, and autonomous selection process ensure unparalleled strategic clarity," says Dr. Kadoshchuk.

CEO Outlook: A Hallucination-Free Future for Generative AI

"StratePlan is not just a breakthrough in strategic AI - it holds the key to solving one of the most pressing challenges in generative language models: hallucinations," explains **Sascha Rissel**, CEO of mAlnthink GmbH.

"With the right interface - still under development - StratePlan could serve as a supervisory control layer for large language models such as ChatGPT. Early research suggests this integration could **eliminate hallucinations almost entirely**. While further investment and interdisciplinary research are required, the potential is transformative."

About mAlnthink GmbH

Headquartered in Worms, Germany, mAlnthink GmbH is a DeepTech company focused on building high-performance, hallucination-free superintelligence for strategic use cases in politics, business, and defense. The company brings together leading expertise in AI research, cognitive system architecture, and applied strategic modeling.
