## **Foxconn Interconnect Technology Unveils New Mobility Brand: One Mobility**

Taipei (ots) -

Foxconn Interconnect Technology (FIT), a global leader in connectivity solutions and a subsidiary of Hon Hai Technology Group, has announced the launch of One Mobility, its new mobility brand. The launch marks FIT's bold entry into the mobility space, driven by transformative trends such as electrification, connectivity, and autonomous driving.

Since 2020, FIT has advanced innovation through its "3+3" strategy, identifying Electrified Vehicles as a core growth pillar alongside 5G AIoT and audio technologies. One Mobility positions the company at the intersection of electronics innovation and automotive expertise.

### **A New Standard in Mobility Manufacturing**

One Mobility is a build-to-print manufacturing partner, supporting automotive customers end-to-end - from concept design and co-development to large-scale production. Leveraging more than 90 years of German automotive engineering expertise, the brand combines precision manufacturing with FIT's cutting-edge electronics capabilities to accelerate intelligent, electrified, and connected mobility innovations. The company offers end-to-end solutions spanning power distribution systems, high- and low-voltage modules, safety and accessory components, and advanced charging systems - covering in-cabin, in-vehicle, and off-vehicle applications. Beyond manufacturing, One Mobility specializes in integration expertise, seamlessly connecting data, power, and sensing to redefine what's possible in modern mobility.

### **Global Reach, Heritage of Excellence**

Operating in 40+ locations across Europe, Asia, North America, and the Middle East and Africa, One Mobility partners with leading OEMs and Tier 1 suppliers. The company builds on the legacy of formerly acquired German brands, Autokabel and Voltaira, recognized for engineering excellence and manufacturing precision.

### **Leadership Perspective**

"One Mobility is more than a brand - it represents unity, innovation, and scale within the FIT Group," said Sidney Lu, CEO of FIT Group. "It combines decades of automotive expertise with the capabilities of the world's largest electronics manufacturer, delivering quality and customer-centric solutions across the full product lifecycle."

"Automotive customers need a true development and production partner," said Martin Weidlich, CEO of One Mobility GmbH. "By combining deep automotive know-how with FIT's electronics leadership, we move fast, think differently, and help our customers stay ahead in a rapidly changing mobility landscape."

### **Driving Connectivity Forward**

One Mobility reflects FIT's ambition to be a driving force in the global mobility ecosystem, delivering differentiated build-to-print capabilities and design-to-delivery support for next-generation vehicle components, modules, and subsystems.

### **About Foxconn Interconnect Technology (FIT Hon Teng)**

Foxconn Interconnect Technology (HKEX: 6088) was listed on the Hong Kong Stock Exchange in 2017 and is the largest consumer electronics connector manufacturer in Asia. While connectors remain its core business, the company has strategically expanded in recent years into 5G AIoT, Mobility, and Audio, while also entering the consumer brand sector.
